

A Reusable Research Poster Template

Author One¹, Author Two², Author Three¹

¹Institution One ²Institution Two

Motivation

Motivation.

- Replace this block with the research problem and why it matters.
- State the limitation of existing methods or benchmarks.
- Use **highlighted text** for institution-themed emphasis.

Contributions.

- Contribution one in a concise sentence.
- Contribution two with a concrete metric or artifact.
- Contribution three explaining the broader impact.

Method Overview

[Insert method, framework, or system diagram here.]

- Describe the main pipeline stages.
- Explain the key design choice or model component.
- Connect the method to the evaluation setup.

Validation

Validation setup.

- Dataset, benchmark, or protocol summary.
- Evaluation metrics and baselines.
- Human evaluation or quality-control process if applicable.

Category	Method	Metric 1	Metric 2	Metric 3
Type A	Baseline 1	00.0	00.0	00.0
Type A	Baseline 2	00.0	00.0	00.0
Type B	Baseline 3	00.0	00.0	00.0
–	Ours	00.0	00.0	00.0

Analysis

Analysis.

- Explain the mechanism behind the main improvement.
- Include an equation, ablation, or qualitative case study.
- Use concise captions because posters are scanned quickly.

$$\text{Score} = \frac{2 \cdot P \cdot R}{P + R}$$

Results

Representative results.

- Summarize the most important comparison before showing a table.
- Highlight where the proposed method improves and where it still fails.

Method	Task 1	Task 2	Task 3	Task 4	Overall
Baseline A	00.0	00.0	00.0	00.0	00.0
Baseline B	00.0	00.0	00.0	00.0	00.0
Baseline C	00.0	00.0	00.0	00.0	00.0
Ours	00.0	00.0	00.0	00.0	00.0

Conclusion & Contact

Takeaways.

- Key contribution and result.
- Main limitation or scope boundary.
- Future direction or release note.
